

ZAIN-UL-ABIDEEN

SOFTWARE ENGINEER

+92 317 4497273 | zainrehan395@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Versatile Software Engineer with 2 years of professional experience in TypeScript, React, Next.js, and Node.js. Proven ability to deliver high-quality, scalable solutions across front-end and back-end development. Experienced in contributing to projects in Project Management Tools and CRM, with a focus on performance, code quality, and team collaboration. Adept at problem-solving, optimizing workflows, and taking ownership of technical challenges

TECHNICAL SKILLS

JavaScript | TypeScript | React | Next.js | Node | AWS | tRPC | Tailwind CSS | UI Libraries | Git | GitHub | Jira | Trello | Vercel | Visual Studio Code | Figma | Canva | Adobe Illustrator

WORK EXPERIENCE

Software Engineer | 12th Spring LLC

Jul 2024 – Present

As a Software Engineer, I contributed to building scalable, performant, and secure applications with a strong focus on React.js, Next.js, and AWS. In addition to front-end development, I gained hands-on experience in backend engineering and cloud infrastructure.

Key Responsibilities:

- Designed and developed React/Next.js applications with optimized rendering, routing, and SEO best practices.
- Implemented server-side rendering (SSR) and static site generation (SSG) in Next.js for improved performance.
- Integrated REST and GraphQL APIs, collaborating with backend teams and sometimes implementing backend endpoints myself using Node.js / Express.
- Developed and optimized scalable AWS solutions, including S3 for storage, Lambda for serverless functions, and CloudFront for content delivery.
- Applied state management (Redux / Zustand / Context API) for complex, data-driven applications.
- Built and maintained CI/CD pipelines (GitHub Actions / AWS pipelines) to automate deployment workflows.
- Conducted code reviews and mentoring, ensuring adherence to clean coding, security, and performance best practices.
- Contributed to backend services by writing APIs, managing databases, and optimizing queries for performance.

Associate Software Engineer | 12th Spring LLC

Jun 2023 – Jun 2024

As an Associate Software Engineer specializing in React development, I contributed to building scalable, user-friendly, and high-performance web applications. My key responsibilities included:

- Developing and maintaining React applications with clean, reusable, and optimized code.
- Implementing responsive UIs with modern front-end frameworks, integrating APIs, and ensuring seamless user experiences.
- Collaborating with cross-functional teams (design, QA) to deliver end-to-end product features.
- Debugging and optimizing performance, improving application load time and reducing rendering issues.
- Using state management tools (Redux / Zustand / Context API) to handle complex data flows.
- Contributing to Agile development with sprint planning, daily stand-ups, and code reviews.

Angular Developer Intern | Intelicode

March 2023 – Jun 2023

- Assisted in developing and maintaining Angular-based web applications, contributing to both front-end features and UI enhancements.
- Implemented responsive and reusable components using Angular and TypeScript to improve code efficiency and maintainability.
- Collaborated with senior developers to debug, test, and optimize application performance, ensuring smooth user experience.
- Improved understanding of software development lifecycle (SDLC), version control (Git), and collaboration in a professional environment.

EDUCATION

BACHELOR'S DEGREE | Bachelor of Computer Sciences | The University of Lahore

2019 – 2023

INTERMEDIATE | Intermediate of Computer Science (ICS) | Kips College, Lahore

2016 – 2018

MATRICULATION | The Educators

2014 – 2016
